Chlorobleach

8.3% powdered chlorine bleaching agent

Chlorobleach 8.3% is a free flowing white powder specifically used for de-staining of cutlery, crockery and fabrics. It is manufactured using organic bleach isocyanurate and is a superior alternative to the use of liquid chlorine bleach.

BENEFITS

- Effectively removes stubborn stains such as tea, coffee and proteins from cutlery and crockery.
- Contains organic chlorine compounds and cause less fibre damage than liquid hypochlorite bleach when used in laundry applications.
- Is more stable in storage than liquid bleach.
- Is safe to use in kitchen and food preparation environments.
- Is an effective kitchen, warewash and laundry bactericide and sanitizer.

Where to use:

- Ideally suited for use as a pre-soak in the ware washing processes.
- Excellent for soaking of stained linens and white fabrics.

DIRECTIONS for USE

Read safety directions before use.

DIRECTIONS

- For pre-soaking of cutlery and crockery, dilute 30g per 5Lt of hot water.
- For soaking of stained white fabric, dilute 30g per 10Lt of water.
- Chlorine Bleach Powder 8.3% should be used at a dilution of 3g per Kg of dry weight of wash load and added to the first rinse in automatic washing machines.

TIPS

Keep container closed to retain maximum performance.
Do not use on coloured fabrics.
Do not mix with other chemicals.

PRODUCT SPECIFICATIONS

Dilution: See above
Fragrance: None
Safety: Irritant
Colour: White powder
Packaging: 4.5kg, 10kg & 20kg
