

Stain Removal

Removing stains from vinyl, linoleum & natural stone

One of the only things that takes Iodine stains out, is Oxyboost Plus (contains Sodium Percarbonate). It will also remove many other stains such as nicotine and many colour stains caused by beverages, food, sauces and cosmetics. This also applies to these stains on marble and granite

Stain Treatment (Vinyl or Marble)

1. Mix 30g Oxyboost Plus (one scoop) in 1Ltre hot tap water. Stir till dissolved and use within 20 minutes.
2. Apply solution to the floor, spread and agitate with a non-scratch scourer.
3. Allow 15 to 30 minutes dwell time.
4. Rinse well with clean water.

Severe Stain Treatment (Vinyl or Marble)

1. Sprinkle a generous quantity of Oxyboost directly onto the floor.
2. Add a little hot water.
3. Scrub thoroughly with a non-scratch pad, to mix the water and Oxyboost Plus and create a thin paste.
4. Allow 15 to 30 minutes dwell time.
5. Rinse well with clean water.

Larger areas

(Vinyl, tile, concrete or natural stone)

1. Mix 10 - 20g Oxyboost Plus in 1Litre ready to use T&G Cleaner Pro solution (use hot tap water). Stir till dissolved and use within 20 minutes.
2. Apply solution to the floor and follow normal cleaning techniques.
