

Deostor Spray

Enzyme based odour control for aerial spraying

Deostor Spray

is powered by the innovative Elimotech chemistry for rapid neutralization of mal-odours both airborne and on surfaces. This is enhanced with proven chemistry for destroying

airborne viruses and microorganisms. Elimotech reacts and neutralizes mal-odours at a micro-molecular level enabling quick and permanent elimination of trapped, embedded and air-borne odours.

Even a thorough disinfection and wash down of an area will not remove all odour molecules.

Micro mal-odour molecules exist in the air, trapped in fabrics carpets and porous materials.

In addition to a cleaning routine, you need an **Odour Control Strategy.**

Recommended applications

Deostor Spray is a performance blend of Elimotech essential oils and volatile, polar solvents which lends itself to numerous easy-to-use applications. Primarily it is used as a stand-alone aerial room spray for misting with a trigger spray or pressure sprayer. Excellent for localized areas too small for fogging equipment or areas where minimum residue is desired.

Deostor Spray is ideal for use in a spray n wipe application on smooth surfaces including appliances and household items.

Deostor Spray is used to great effect for injecting into cushions, upholstery, carpeting and soft surfaces to assist with the permanent eradication of mal-odours caused by food & beverage spills, urine, mould or smoke.

Benefits

- **Professional odour neutralising technology** - This patented formula works by odour-pairing on a molecular level.
- **A complete solution** - Elimotech reacts instantly with mal-odour compounds, creating an inert, non-reversible molecule for permanent eradication. It does not absorb or mask mal odors.
- **Sophisticated chemistry** - The Deostor Spray formulary is based on the Elimotech essential oils and enhanced with proven aerial disinfection chemistry in a volatile, polar solvent base which provides high level odour neutralization in an easy-to-use format.
- **Surface safe** - Deostor Extreme is safe to use on virtually all water cleanable hard surfaces, carpets, fabrics and garments.
- **Wide application** - Formulated for eradicating the stench of rotting organics, human and animal waste and mal-odours caused by fire activity.
- **Fresh Residual Scent** - Deodorises the treated area with a fresh replacement scent to reset the olfactory senses.

PRODUCT SPECIFICATIONS

Product code: Citrus AP524

pH: 7.5 RTU

Fragrance: Floral

Deostor Spray

Enzyme based odour control for aerial spraying

DIRECTIONS

Always pre-test in an inconspicuous location for substrate sensitivity to chemicals. Observe all safety directions and read the SDS before use.

Note that Deostor Spray is flammable. Take necessary precautions to avoid fire.

Wear suitable respiratory equipment when aerosolizing Deostor Spray in large quantities.

Do not wet or thermal fog.

Mixing

- Deostor Spray is supplied ready-to-use. No dilution required.
- For light applications dilute 1:1 with water of methylated spirits.

Application:

Deostor Spray is typically used after remediation work is complete.

1. Remove or cover all food, food equipment and any items which may be negatively affected by water-based solvents.
2. Mist in areas requiring treatment. Avoid overapplication. The treated area can normally be reoccupied within 30 minutes.
3. Spray mist directly onto surfaces requiring treatment. Allow 5-10 minutes reaction time and wipe dry with an absorbent cloth.
4. Inject directly into cushions, upholstery, carpeting and soft surfaces. Diluting 1:1 to 1:3 with methylated spirits will aid spreading within the cushioning. Avoid overapplication which can cause deformation.
