

# Deozyme PDS

Enzyme digester & odour neutraliser

Ultimate urine & organics decontamination

Deozyme is formulated with four active enzymes to treat odours in hard-to-reach places. Deozyme blends Bacillus organisms with a patented odour neutraliser to treat odours at the source. Highly effective in eliminating the stench from urine, human & animal waste,

spoiled foods and decaying matter. Deozyme leaves a clean, sanitary scent wherever it is used.

Simply cleaning an area will not remove odour molecules?

Bad odours exist in the air, are trapped in fabrics, carpets and porous materials. In addition to a cleaning routine, you need an Odour Control Strategy!

## RECOMMENDED APPLICATIONS

Deozyme is highly effective on most water cleanable surfaces including synthetic materials, wood, concrete, stone, tiles and grout.

Deozyme is also ideal for use on all wool and synthetic fibres. However, pretesting is recommended especially on delicate fibres to ensure dye and fibre stability and possible sensitivity to chemicals.

## BENEFITS

- **Elimotech Powered** - This patented odour neutralising formula works by odour-pairing on a molecular level.
- **Wide application** - Instantly eliminates the stench of decaying matter, urine, necrotic tissue, sewage and human / animal remains.
- **Sophisticated enzyme chemistry** - Powerful biologic quad-enzyme action digests organic odour sources.

- **Aerial odour control** - Neutralises air-borne mal odours.
- **Stain Removal** - Proprietary agents employed for effective organic stain removal.
- **Fresh residual scent** - A fresh floral scent resets the olfactory senses.

## DIRECTIONS

Always pre-test in an inconspicuous location for substrate sensitivity to chemicals. Observe all safety directions and read the SDS before use.

SHAKE WELL BEFORE USING. Deozyme is safe when used as directed.

Use of hot water, bleach, and chlorinated products may kill the active bacteria in this product. Do not mix Deozyme with any other product.

## PRODUCT SPECIFICATIONS

**Product code:** AP438

**pH:** 7.5 RTU

**Fragrance:** Floral

## HUMAN/ANIMAL WASTE AND ORGANIC MATTER DECONTAMINATION

### Mixing

- Add 30-60ml per litre of water (1:16 to 1:32) depending on soil conditions.
- For heavy soil conditions, up to 100ml per litre can be added. If used on sensitive surfaces, always pre-test for substrate chemical sensitivity.

### Application

1. Apply the solution to a workable area using a sprayer, sponge or scrubber machine. Do not allow solution to dry onto the surface.
2. Agitate and allow 30 minutes dwell time. Keep moist with solution.

# Deozyme PDS

Enzyme digester & odour neutraliser

Ultimate urine & organics decontamination

3. Rinse the surface thoroughly using clean water. A high pressure or wet extraction washing system, will provide effective results.
4. A 1:100 Deozyme solution can be left as residual on resilient surfaces for further odour removal and re-odorizing activity.

## URINE DECONTAMINATION

### Mixing

- Add 250-500ml per litre of water (1:3 to 1:1) depending on urine conditions.

### Application:

1. Apply the solution to a workable area. Ensure complete saturation of the affected area to ensure complete contact with organic matter.
2. Agitate and allow 60 minutes dwell time. Do not allow treated area to dry.
3. Rinse the surface thoroughly using clean water. A wet extraction system, will provide effective results. The use of a water claw is recommended for a deep-set contamination.
4. Provide assisted drying.
5. A 1:100 Deozyme solution can be left as residual on resilient surfaces for further odour removal and re-odorising activity.
