

Deostor Extreme

Odour control for extreme conditions

air-borne odours.

Even a thorough disinfection and wash down of an area will not remove all odour molecules.

Micro smoke odour particles exist in the air, trapped in fabrics carpets and porous materials.

In addition to a cleaning routine, you need an **Odour Control Strategy.**

Recommended applications

Deostor Extreme is formulated for treatment of severe odour conditions and obnoxious odours known for their persistence including tobacco, curry and cadaverine. It is not only a blend of the most potent odour control chemistries but is also highly concentrated and is therefore always used in a blend with another odour control product or wash-down detergent.

BENEFITS

- **Professional odour neutralising technology** - This patented formula works by odour-pairing on a molecular level.
- **A sure-fire solution** – Elimotech reacts instantly with mal-odour compounds, creating an inert, non-reversible molecule for permanent eradication. It does not absorb or mask mal odors.

Deostor Extreme employs a high concentration of the most powerful of Elimotech chemistry for rapid neutralization of the toughest of obnoxious odours. Elimotech reacts and neutralizes mal-odours at a micro-molecular level enabling quick and permanent elimination of trapped, embedded and

- **Powerful** – Formulated for use on tough odour scenes such as tobacco, curry, death scenes, strong animal odours and where other treatments have failed.
- **Surface safe** – Deostor Extreme is safe to use on virtually all water cleanable hard surfaces, carpets, fabrics and garments.
- **Versatile application** – Ideal for use as a stand-alone treatment, for boosting wash down detergents and in garment remediation work.
- **Fresh Residual Scent** – Deodorises the treated area with a fresh replacement scent to reset the olfactory senses.

Additive guide

Deostor Extreme can be effectively added to;

- Actichem Deostor Fire and Deostor Organic
- Actichem Fire Fix and Fire Restore
- Actichem Biosan II, Deozyme and Deosan
- Most laundry washing detergents
- Actichem Carpet & Upholstery prespray and in-tank solutions.

Do not add to oxidising and chlorine solutions without consulting an Actichem technician.

Elimotech Technology is a patented odour control solution based on high performance enzyme technology.

Deostor Extreme

Odour control for extreme conditions

DIRECTIONS

Always pre-test in an inconspicuous location for substrate sensitivity to chemicals. Observe all safety directions and read the SDS before use.

Do not cold/wet or thermal fog.

Deostor Organic is safe when used as directed.

Mixing

- Add 10-30ml per litre of ready-to-use Deostor solution.
- Add 15-40ml per litre of ready-to-use Deostor solution for initial knock-down applications
- Add 10-30ml per litre of ready-to-use restoration wash down solution.
- For laundering, add 5-10ml per kg of washing.

Application:

1. Always physically remove decaying organic matter or charred items which are to be disposed of.
2. Ensure that the solution containing Deostor Extreme comes in contact with the offending source.
3. Airless paint sprayers are ideal for larger area treatment.
4. Where organic contaminants are encountered the area must be co-treated with a biocide and/or an enzyme bacteria blend.

Over-application of **Deostor Extreme** can result in long lasting fragrant odours remaining which may be undesirable to certain individuals.
