

Hypo Enforcer

The blitz option for mould build-up, mildew & moss

Actichem's Hypo Enforcer is the core proprietary ingredients used to make Mould Exterminator the amazing product that it is. Packed into a convenient 1Lt pack.

The 1Lt Hypo Enforcer pack is like a nitrous boost to the chlorine power in Sodium Hypochlorite. On its own, Sodium Hypochlorite will only actually release a small percentage of its real power when applied to a mould affected surface. This is due to its in-built stabilisation mechanism as well

as its poor wetting ability. When you add Hypo Enforcer, Sodium Hypochlorite comes alive. You will immediately extract every single atom of power out of the Chlorine molecule, and drive that power right down deep into the roots and hyphae of the mould and thoroughly destroy it.

MOULD

Hypo Enforcer + Chlorine's unique, super-wetting formula, provides consistent, reliable results in mould remediation every time. It's powerful stain removal can be seen almost instantly when applied to mould affected surfaces. Hypo Enforcer + Chlorine penetrates deep into the affected surface and completely destroys the mould hyphae and root system. This ensures a 100% clearance report on every mould remediation job.

Benefits

- **Disinfects bio-contaminated surfaces.**
- **Kills mould (including roots and hyphae) and removes the staining.**
- **Penetration** – To provide complete mould removal of target surfaces, this powerful anti-microbial package has been combined with super-wetting technology. This enables the Hypochlorous Acid to penetrate faster and deeper into the inner-structure of fibre and porous substrates.
- **Cleaning and Destaining** – Actichem Enforcer also provide outstanding cleaning power to remove the accompanying organic grime.

Directions

Always pre-test in an inconspicuous location for substrate sensitivity to chemicals. Observe all safety directions and read the SDS before use.

Mixing

- Add 1Lt of Enforcer to 15Lt of 12.5% Sodium Hypochlorite (Pool Chlorine). Mix well.

Solution	TOTAL QUANTITY REQUIRED	
	Chlorine	Hypo Enforcer
1Lt	960ml	60ml
2Lt	1,87Lt	125ml
3Lt	2.8Lt	200ml
4Lt	3.75Lt	250ml
5Lt	4.7ml	300ml
10Lt	9.4Lt	600ml
16Lt	15Lt	1Lt

Application:

1. Remove and clean away all wet and dry debris.
2. Apply Enforcer Chlorine solution to the affected area. Ensure all surfaces come into contact with the solution. Application can be by means of spray, mop or cloth.
3. Agitate briefly, where possible to promote penetration into porous substrates. Thorough agitation will dramatically aid mould and stain removal.
4. Allow a minimum of 1 minute dwell time for disinfection and 5 minutes dwell time for mould remediation.
5. Rinse thoroughly with clean water where possible.

Note

- Do not use or allow contact on carpets, fabrics or sensitive surfaces.
- After cleaning and disinfection is completed, Actichem Biosan II can be applied as a post residual treatment for enhanced inhibition of fresh mould growth.
