

# SAFETY DATA SHEET

## ODOURTAK SV CITRUS

ACTICHEM PTY LTD

Product code: **AP527**

Version No: **2.3**

Issue date: **02/10/2025**

Safety Data Sheet according to WHS and ADG requirements

### SECTION 1 IDENTIFICATION OF THE SUBSTANCE / MIXTURE AND OF THE COMPANY / UNDERTAKING

#### Product Identifier

|              |                    |
|--------------|--------------------|
| Product name | ODOURTAK SV CITRUS |
| Product code | AP527              |
| Pack sizes   | 1L & 5L            |

#### Relevant identified uses of the substance or mixture and uses advised against

|                          |                                                                 |
|--------------------------|-----------------------------------------------------------------|
| Relevant identified uses | Odour neutralizing concentrate for thermal fogging applications |
|--------------------------|-----------------------------------------------------------------|

#### Details of the manufacturer/importer

|                         |                                               |
|-------------------------|-----------------------------------------------|
| Registered company name | ACTICHEM PTY LTD                              |
| Address                 | 11 Gamma Close, Beresfield 2322 NSW Australia |
| Telephone               | (02) 4966 5516                                |
| Website                 | www.actichem.com.au                           |
| Email                   | info@actichem.com.au                          |

#### Emergency telephone number

|                                   |                            |
|-----------------------------------|----------------------------|
| Association / Organisation        | Poisons Information Centre |
| Emergency telephone numbers       | 13 11 26                   |
| Other emergency telephone numbers | Not Available              |

### SECTION 2 HAZARDS IDENTIFICATION

#### Classification of the substance or mixture

HAZARDOUS CHEMICAL. NON-DANGEROUS GOODS. According to the Model WHS Regulations and the ADG Code.

|                    |                                                                                                                                                                             |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Poisons Schedule   | Not Applicable                                                                                                                                                              |
| GHS Classification | Eye Irritation Category 2A, Sensitisation (Skin) Category 1, Aspiration Hazard Category 1.<br><i>Classification drawn from HCIS and ECHA Inventory and Supplier's SDSs.</i> |

#### Label elements

|                   |                                                                                                                                                                         |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Hazard pictograms |   |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

|             |               |
|-------------|---------------|
| SIGNAL WORD | <b>DANGER</b> |
|-------------|---------------|

#### Hazard statement(s)

|      |                                               |
|------|-----------------------------------------------|
| H319 | Causes serious eye irritation                 |
| H317 | May cause an allergic skin reaction           |
| H304 | May be fatal if swallowed and enters airways. |

#### Precautionary statement(s) Prevention

|      |                                                                        |
|------|------------------------------------------------------------------------|
| P280 | Wear protective gloves and eye protection/face protection.             |
| P264 | Wash thoroughly after handling.                                        |
| P272 | Contaminated work clothing should not be allowed out of the workplace. |

#### Precautionary statement(s) Response

|                          |                                                                                                                                                                                              |
|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| P302+P352+P333+P313      | IF ON SKIN: Wash with plenty of water and soap. If skin irritation or rash occurs, get medical advice / attention.                                                                           |
| P305+P351+P338+P337+P313 | IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do so. Continue rinsing. If eye irritation persists: Get medical advice/attention |
| P301+P310+P331           | IF SWALLOWED: Immediately call a POISON CENTRE or doctor. Do NOT induce vomiting.                                                                                                            |
| P370+P378                | In case of fire: Use alcohol resistant foam or normal protein foam for extinction.                                                                                                           |
| P363                     | Wash contaminated clothing before reuse.                                                                                                                                                     |

#### Precautionary statement(s) Storage

|      |                  |
|------|------------------|
| P405 | Store locked up. |
|------|------------------|

#### Precautionary statement(s) Disposal

|      |                                                                                 |
|------|---------------------------------------------------------------------------------|
| P501 | Dispose of contents / container in accordance with local government regulations |
|------|---------------------------------------------------------------------------------|

### SECTION 3 COMPOSITION / INFORMATION ON INGREDIENTS

#### Substances

See section below for composition of Mixtures.

#### Mixtures

| CAS No       | %[weight] | Name                                               |
|--------------|-----------|----------------------------------------------------|
| 67-63-0      | <10       | <u>isopropanol</u>                                 |
| 8000-48-4    | <10       | <u>eucalyptus oil</u>                              |
| Trade secret | <10       | <u>proprietary fragrance A</u>                     |
| Trade secret | <10       | <u>proprietary fragrance B</u>                     |
| 64742-47-8   | >60       | <u>distillates (petroleum), hydrotreated light</u> |

The specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret.

### SECTION 4 FIRST AID MEASURES

#### Description of first aid measures

|              |                                                                                                                                                                                                                                                                                                                                                                                                                       |
|--------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Eye Contact  | If this product comes in contact with the eyes:<br>Wash out immediately with fresh running water.<br>Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids.<br>If pain persists or recurs seek medical attention.<br>Removal of contact lenses after an eye injury should only be undertaken by skilled personnel. |
| Skin Contact | If skin contact occurs:<br>Immediately remove all contaminated clothing, including footwear.<br>Flush skin and hair with running water (and soap if available).<br>Seek medical attention in event of irritation or rash.                                                                                                                                                                                             |
| Inhalation   | If vapours or spray are inhaled remove from contaminated area into fresh air.<br>If breathing is difficult obtain medical advice/attention without delay.                                                                                                                                                                                                                                                             |
| Ingestion    | DO NOT induce vomiting.<br>Seek medical advice/attention without delay.                                                                                                                                                                                                                                                                                                                                               |

#### Indication of any immediate medical attention and special treatment needed.

Treat symptomatically.

### SECTION 5 FIREFIGHTING MEASURES

#### Extinguishing media

|                     |                                                                  |
|---------------------|------------------------------------------------------------------|
| Extinguishing media | Use alcohol resistant foam or normal protein foam for extinction |
|---------------------|------------------------------------------------------------------|

#### Special hazards arising from the substrate or mixture.

|                        |                                           |
|------------------------|-------------------------------------------|
| Fire incompatibilities | Avoid contamination with oxidising agents |
|------------------------|-------------------------------------------|

#### Advice for firefighters

|                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Fire fighting         | Alert Fire Brigade and tell them location and nature of hazard.<br>May be violently or explosively reactive.<br>Wear breathing apparatus plus protective gloves in the event of a fire.<br>Prevent, by any means available, spillage from entering drains or water course.<br>Consider evacuation (or protect in place).<br>Fight fire from a safe distance, with adequate cover.<br>If safe, switch off electrical equipment until vapour fire hazard removed.<br>Use water delivered as a fine spray to control the fire and cool adjacent area.<br>Avoid spraying water onto liquid pools.<br><b>Do not approach containers suspected to be hot.</b> |
| Fire/Explosion Hazard | <b>Contains low boiling substance:</b> Closed containers may rupture due to pressure buildup under fire conditions.<br>Severe fire hazard when exposed to heat, flame and/or oxidisers.<br>Heating may cause expansion or decomposition leading to violent rupture of containers.<br>On combustion, may emit toxic fumes of carbon monoxide (CO), carbon dioxide (CO2) and other pyrolysis products typical of burning organic material                                                                                                                                                                                                                 |
| HAZCHEM               | 3Y                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

SECTION 6 ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

|              |                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|--------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Minor Spills | Clean up all spills immediately.<br>Avoid breathing vapours and contact with skin and eyes.<br>Control personal contact with the substance, by using protective equipment.<br>Contain and absorb spill with sand, earth, inert material or vermiculite.<br>Wipe up.<br>Place in a suitable, labelled container for waste disposal.                                                                                                                          |
| Major Spills | Wear eye protection plus protective gloves.<br>Prevent, by any means available, spillage from entering drains or water course.<br>Stop leak if safe to do so.<br>Absorb on sand, dirt, vermiculite or similar absorbent material. Place into labelled drums and dispose of according to local government regulations.<br>Immediately notify emergency services (Police or Fire Brigade) if the spill is too large for you to safely and effectively handle. |
| PPE          | Personal Protective Equipment advice is contained in Section 8 of the SDS.                                                                                                                                                                                                                                                                                                                                                                                  |

SECTION 7 HANDLING AND STORAGE

Precautions for safe handling

|                   |                                                                                                                                                                                                                                                                                                        |
|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Safe handling     | Wear respiratory protection and eye protection when risk of exposure occurs.<br>Use in a well-ventilated area.<br>Avoid contact with incompatible materials.<br>When handling, DO NOT eat, drink or smoke.<br>Keep containers securely sealed when not in use.<br>Avoid physical damage to containers. |
| Other information |                                                                                                                                                                                                                                                                                                        |

Conditions for safe storage, including any incompatibilities.

|                         |                                                                                                                                                       |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| Suitable container      | Polyethylene or polypropylene container.<br>Packing as recommended by manufacturer.<br>Check all containers are clearly labelled and free from leaks. |
| Storage incompatibility | Avoid reaction with oxidising agents                                                                                                                  |

SECTION 8 EXPOSURE CONTROLS / PERSONAL PROTECTION

Control parameters

OCCUPATIONAL EXPOSURE LIMITS (OEL)

INGREDIENT DATA

| Source                       | Ingredient  | Material name     | TWA                 | STEL                 | Peak          | Notes         |
|------------------------------|-------------|-------------------|---------------------|----------------------|---------------|---------------|
| Australia Exposure Standards | isopropanol | Isopropyl alcohol | 683 mg/m3 / 400 ppm | 1230 mg/m3 / 500 ppm | Not Available | Not Available |

EMERGENCY LIMITS

| Ingredient  | Material name     | TEEL-1  | TEEL-2  | TEEL-3     |
|-------------|-------------------|---------|---------|------------|
| isopropanol | Isopropyl alcohol | 400 ppm | 400 ppm | 12,000 ppm |

| Ingredient  | Original IDLH | Revised IDLH    |
|-------------|---------------|-----------------|
| isopropanol | 12,000 ppm    | 2,000 [LEL] ppm |

Exposure controls

|                                  |                                                                                                                                                                                                                                                                                                                                     |
|----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Appropriate engineering controls | Maintain adequate ventilation at all times. In most circumstances natural ventilation systems are adequate.<br>If ventilation is poor, then the use of a local exhaust ventilation system is recommended                                                                                                                            |
| Personal protection              |                                                                                                                                                                                                                                                  |
| Eye and face protection          | Safety glasses with side shields OR Chemical goggles.<br>Contact lenses may pose a special hazard; soft contact lenses may absorb and concentrate irritants. Lens should be removed at the first signs of eye redness or irritation. Lens should be removed in a clean environment only after workers have washed hands thoroughly. |
| Skin protection                  | See Hand protection below                                                                                                                                                                                                                                                                                                           |
| Hands/feet protection            | It is good practice to wear protective gloves when handling chemicals. Neoprene gloves are recommended for this application.                                                                                                                                                                                                        |
| Body protection                  | See Other protection below                                                                                                                                                                                                                                                                                                          |
| Other protection                 | Eye wash unit.                                                                                                                                                                                                                                                                                                                      |
| Thermal hazards                  | Not Available                                                                                                                                                                                                                                                                                                                       |

## SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES

### Information on basic physical and chemical properties

|                                              |                   |                                         |               |
|----------------------------------------------|-------------------|-----------------------------------------|---------------|
| Appearance                                   | Clear liquid      |                                         |               |
| Physical state                               | Liquid            | Relative density (Water = 1)            | Not Available |
| Odour                                        | Strongly fragrant | Partition coefficient n-octanol / water | Not Available |
| Odour threshold                              | Not Available     | Auto-ignition temperature (°C)          | Not Available |
| pH (as supplied)                             | Not applicable    | Decomposition temperature               | Not Available |
| Melting point / freezing point (°C)          | Not Available     | Viscosity (cSt)                         | Not Available |
| Initial boiling point and boiling range (°C) | Not Available     | Molecular weight (g/mol)                | Not Available |
| Flash point (°C)                             | >90°C             | Taste                                   | Not Available |
| Evaporation rate                             | Not Available     | Explosive properties                    | Not Available |
| Flammability                                 | Flammable         | Oxidising properties                    | Not Available |
| Upper Explosive Limit (%)                    | Not Applicable    | Surface Tension (dyn/cm or mN/m)        | Not Available |
| Lower Explosive Limit(%)                     | Not Applicable    | Volatile Component (%vol)               | Not Available |
| Vapour pressure (kPa)                        | Not Available     | Gas group                               | Not Available |
| Solubility in water (g/L)                    | Complete          | pH as a solution (1%)                   | Not Available |
| Vapour density (Air = 1)                     | Not Available     | VOC g/L                                 | Not Available |

## SECTION 10 STABILITY AND REACTIVITY

|                                    |                                                                                                                                  |
|------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| Reactivity                         | See section 7                                                                                                                    |
| Chemical stability                 | Unstable in the presence of incompatible materials.<br>Product is considered stable.<br>Hazardous polymerisation will not occur. |
| Possibility of hazardous reactions | See section 7                                                                                                                    |
| Conditions to avoid                | See section 7                                                                                                                    |
| Incompatible materials             | See section 7                                                                                                                    |
| Hazardous decomposition products   | See section 5                                                                                                                    |

## SECTION 11 TOXICOLOGICAL INFORMATION

### Information on toxicological effects

|              |                                                                                                              |
|--------------|--------------------------------------------------------------------------------------------------------------|
| Inhaled      | The material is not thought to produce adverse health effects of the respiratory tract                       |
| Ingestion    | No harmful effects are anticipated from the accidental ingestion of the material.                            |
| Skin Contact | The material may cause an allergic skin reaction.                                                            |
| Eye          | This material can cause eye irritation in some persons. Eye contact may cause tearing or blurring of vision. |
| Chronic      | No relative data is listed.                                                                                  |

### Toxicological effects of ingredients

|             |                                |                                                                                                       |
|-------------|--------------------------------|-------------------------------------------------------------------------------------------------------|
| isopropanol | Acute toxicity                 | Oral LD50 (rat) 5045 – 5840 mg/kg Dermal LD50 (rabbit) 12800 mg/kg Inhalation LC50 (rat) 16000 ppm/8h |
|             | Skin corrosion/irritation      | May be irritating to skin                                                                             |
|             | Eye damage/irritation          | Causes serious eye irritation                                                                         |
|             | Respiratory/skin sensitization | Not expected to be a sensitizer                                                                       |
|             | Germ cell mutagenicity         | Not considered to be a mutagenic hazard                                                               |
|             | Carcinogenicity                | Not considered to be a carcinogenic hazard.                                                           |
|             | Reproductive toxicity          | Not considered to be toxic to reproduction                                                            |
|             | STOT (single exposure)         | May cause drowsiness or dizziness                                                                     |
|             | STOT (repeated exposure)       | Not expected to cause toxicity to a specific organ                                                    |
|             | Aspiration toxicity            | Not expected to be an aspiration hazard                                                               |

|                                             | Reproductive toxicity          | The components of this product are not reported to produce reproductive effects in humans                                                                                                                                                                                      |
|                                             | STOT (single exposure)         | No available data                                                                                                                                                                                                                                                              |
|                                             | STOT (repeated exposure)       | With repeated exposure this product may cause damage to the following organs: Blood, skin, central nervous system                                                                                                                                                              |
|                                             | Aspiration toxicity            | No available data                                                                                                                                                                                                                                                              |
|                                             |                                |                                                                                                                                                                                                                                                                                |

## SECTION 12 ECOLOGICAL INFORMATION

### Toxicity

|             | Endpoint | Duration (Hr.) | Species                       | Value     |
|-------------|----------|----------------|-------------------------------|-----------|
| isopropanol | LC50     | 96             | Fish                          | 9-640mg/L |
|             | EC50     | 48             | Crustacea                     | 12500mg/L |
|             | EC50     | 72             | Algae or other aquatic plants | >1000mg/L |
|             | EC0      | 24             | Crustacea                     | 5-102mg/L |
|             | NOEC     | 504            | Crustacea                     | =30mg/L   |

### Persistence and degradability

| Ingredient  | Persistence: Water/Soil   | Persistence: Air         |
|-------------|---------------------------|--------------------------|
| isopropanol | LOW (Half-life = 14 days) | LOW (Half-life = 3 days) |

### Bio accumulative potential

| Ingredient  | Bioaccumulation |
|-------------|-----------------|
| isopropanol | LOW (BCF = 130) |

### Mobility in soil

| Ingredient  | Mobility          |
|-------------|-------------------|
| isopropanol | HIGH (KOC = 1.06) |

## SECTION 13 DISPOSAL CONSIDERATIONS

## Waste treatment methods

|                              |                                                                                                                                                |
|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| Product / packaging disposal | Recycle containers whenever possible.<br>Product residues and containers should be disposed of in accordance with local government regulations |
|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|

## SECTION 14 TRANSPORT INFORMATION

## Labels Required

|                  |    |
|------------------|----|
| Marine Pollutant | NO |
| HAZCHEM          | 3Y |

Land transport (Not Applicable): NOT REGULATED FOR TRANSPORT OF DANGEROUS GOODS

## SECTION 15 REGULATORY INFORMATION

## Safety, health and environmental regulations / legislation specific for the substance or mixture

## ISOPROPANOL IS FOUND ON THE FOLLOWING REGULATORY LISTS

Australia Hazardous Chemical Information System (HCIS) - Hazardous Chemicals  
Australian Inventory of Industrial Chemicals (AIIC)  
International Agency for Research on Cancer (IARC) - Agents Classified by the IARC Monographs

## EUCALYPTUS OIL IS FOUND ON THE FOLLOWING REGULATORY LISTS

Australia Standard for the Uniform Scheduling of Medicines and Poisons (SUSMP) - Schedule 6  
Australian Inventory of Industrial Chemicals (AIIC)

## DISTILLATES, PETROLEUM, LIGHT, HYDROTREATED IS FOUND ON THE FOLLOWING REGULATORY LISTS

Australia Hazardous Chemical Information System (HCIS) - Hazardous Chemicals  
Australian Inventory of Industrial Chemicals (AIIC)  
Chemical Footprint Project - Chemicals of High Concern List  
International Agency for Research on Cancer (IARC) - Agents Classified by the IARC Monographs  
International Agency for Research on Cancer (IARC) - Agents Classified by the IARC Monographs - Group 1: Carcinogenic to humans

## PROPRIETARY FRAGRANCE A - ALL THE COMPONENTS ARE LISTED OR EXEMPT IN THE FOLLOWING REGULATORY LIST

Australian Inventory of Industrial Chemicals (AIIC)  
Australia Hazardous Chemical Information System (HCIS) - Hazardous Chemicals

## PROPRIETARY FRAGRANCE B - ALL THE COMPONENTS ARE LISTED OR EXEMPT IN THE FOLLOWING REGULATORY LIST

Australian Inventory of Industrial Chemicals (AIIC)

## SECTION 16 OTHER INFORMATION

## Revision Schedule

|               |            |
|---------------|------------|
| Revision Date | 02/10/2025 |
| Initial Date  | 01/10/2019 |

## SDS Version Summary

| Version | Issue Date | Sections Updated                                             |
|---------|------------|--------------------------------------------------------------|
| 2.1     | 28/06/2021 | Sections 2, 3, 11, 12, 15, 16 have been updated or corrected |
| 2.2     | 07/07/2022 | Section 2, 4.                                                |
| 2.3     | 02/10/2025 | Section 2, 4, 5, 15.                                         |

## Other information

Classification of the preparation and its individual components has drawn on official and authoritative sources such as the ECHA C&L Chemical Inventory, HSNO (CCID) New Zealand, AICIS and HCIS Australia

DISCLAIMER: While the information in this Safety Data Sheet (SDS) is believed to be true and accurate based on the current level of knowledge available to us, the author makes no representations as to its accuracy or sufficiency. Conditions of use are beyond the control of ACTICHEM PTY LTD and therefore the users are responsible to verify this data under their own particular conditions of use, applications and regulations to determine whether the product is suitable for their particular purpose and they assume all risks of their use, handling, disposal, reliance upon, publication or use of the information contained herein. This information applies only to the product designated above and does not necessarily apply to its use in combination with other materials, products, chemical compounds, structures, or processes.

## Definitions and abbreviations

|          |                                                         |
|----------|---------------------------------------------------------|
| PC-TWA:  | Permissible Concentration-Time Weighted Average         |
| PC-STEL: | Permissible Concentration-Short Term Exposure Limit     |
| IARC:    | International Agency for Research on Cancer             |
| ACGIH:   | American Conference of Government Industrial Hygienists |
| STEL:    | Short Term Exposure Limit                               |
| TEEL:    | Temporary Emergency Exposure Limit                      |
| IDLH:    | Immediate Danger to Life or Health Concentrations       |
| OSF:     | Odour Safety Factor                                     |
| NOAEL:   | No Observed Effects Level                               |
| TLV:     | Threshold Limit Value                                   |
| LOD:     | Limit Of Detection                                      |
| OTV:     | Odour Threshold Value                                   |
| BCF:     | Bio Concentration Factors                               |
| BEI:     | Biological Exposure Index                               |
