

Mould Exterminator

Mould, mildew & mould stain remover

Mould Exterminator by Actichem is an advanced mould remediation solution developed through extensive research to enhance the effectiveness of chlorine in hypochlorite solutions.

Its powerful stain removal can be seen almost instantly when applied to mould-affected surfaces. Mould Exterminator's potentiated chlorine technology penetrates deep into the affected surface completely destroying the mould hyphae and root system, making it ideal for sub-floors, external walls, roofs, and uninhabited structures.

This ensures a 100% clearance report on every mould remediation job.

Benefits

Enhanced Disinfection

Utilises potentiated chlorine to disinfect bio-contaminated surfaces and kill mould, including its roots and hyphae.

Deep Penetration

To provide complete mould removal of target surfaces, this powerful anti-microbial package has been combined with super-wetting technology. This enables the Hypochlorous Acid to penetrate faster and deeper into the inner-structure of fibre and porous substrates.

Powerful Stain Removal

Provides almost instant removal of stains associated with mould without the need for scrubbing.

Outstanding Cleaning Power

Effectively cleans away organic grime that often accompanies mould growth.

Solution

Mould Exterminator addresses the challenge of removing persistent mould and fungal infestations from a variety of surfaces.

Its innovative formula ensures thorough mould eradication by penetrating deeply into affected areas and destroying the mould's root system. The super-wetting technology allows for rapid and comprehensive treatment, delivering consistent and reliable results with minimal effort.

The product's ability to disinfect and clean simultaneously makes it a comprehensive solution for mould remediation and surface cleaning.

PRODUCT DATASHEET

Directions For Use

Always pre-test in an inconspicuous location for substrate sensitivity to chemicals. Observe all safety directions and read the SDS before use.

Where to use

Ideal for use in uninhabited buildings, strip-outs, sub-floors, external walling, landscape structures, roofs and pathways.

Application

1. Ready to use. No mixing required.
2. Remove and clean away all wet and dry debris.
3. Apply Mould Exterminator to the affected area. Ensure all surfaces come into contact with the Mould Exterminator. Application can be by means of spray, mop or cloth.
4. Agitate areas with organic or mould build-up to promote complete removal of the bio-mass. Agitation will also aid mould and stain removal.
5. Allow a minimum of 1 minute dwell time for disinfection and 10 minutes dwell time for mould remediation.
6. Rinse thoroughly with clean water, where possible.
7. Repeating this process may be required for areas with heavy organic loading.

Additional Information

- Do not use or allow contact on carpets, fabrics or sensitive surfaces.

- After cleaning and disinfection is completed, Actichem Biosan II can be applied as a post residual treatment for enhanced inhibition of fresh mould growth.
- Further information can be found in the Actichem Mould Dream Team booklet.
- Masonry and stone surfaces can be sealed with an Actichem penetrating sealer to prevent future mould growth.
- **Must be used within 12 months of manufacture date.**

Product Specifications

Product Code:	AP726
pH:	11.5
Colour:	Light Yellow
Fragrance	Lemon
Safety:	Danger
Packaging:	750mL, 5Lt & 20Lt
